

Testimony of:
Dr. Francis Christian FRCSEd, FRCSC

20 April 2023

<https://www.harppublishing.ca/to-a-nurse-friend-weeping>

<https://francischristian.substack.com/>

Scope of my testimony

- 1. Our children and the covid-19 vaccine
- 2. The suppression of early, effective treatment
- 3. How are vaccine injuries reported in Canada?

“Data give me data”

“Data give me TRANSPARENT data”

- Sherlock Holmes to Watson in the age of covid

- Data should not be used to frighten the population - the truth always comes out
- Data should not be used to manipulate the population - the population pays the salary of public health officials, physicians and politicians
- Data should not be used to obscure the real data - there will be a price to pay
- Data should be transparent and consistent and VERIFIABLE

Alberta Data - Diagnosis of covid-19 after 1st dose

Note - **Peak of cases** at about **10 days**
after **1st dose**

In SK = Unvaccinated

Alberta data: Hospitalizations after 1st dose
(SK data not released)

Note - Peak of hospitalizations at 5-15 days after 1st dose
In SK = Unvaccinated

Alberta data: deaths after 1st dose (SK data not released)

Note: Death peaks at 12 days after 1st dose of vaccine
In SK = Unvaccinated

Canadian ICU Data- what constitutes an “ICU Bed” (and other factors)

- ICU Bed is NOT a physical bed.
- ICU Bed = Nursing, physician and other staff required to staff a bed
- During the pandemic - was the real ICU bed shortage really a shortage of staff (burnout, sick leave etc)?
- Were patients admitted to ICU “with” covid vs “because of covid?”
- How many co-morbidities did the average ICU patient have?

What about ICU bed usage Canada before and after the pandemic?

Across Canada - pandemic ICU admissions below 2019 pre-pandemic levels

Our children and the covid-19 injection/vaccine

For three years, Pfizer Italy employees provided free cell phones, photocopiers, printers and televisions to doctors, arranged for vacations (such as "weekend in Gallipoli," "weekend with companion" and "weekend in Rome") and even made direct cash payments (under the guise of lecture fees and honoraria) in return for promises by doctors to recommend or prescribe Pfizer's products.

Journal of Cardiovascular Magnetic Resonance **13**, Article number: M7 (2011) | [Cite this article](#)

3419 Accesses | 15 Altmetric | [Metrics](#)

25.5% dead in 10 years

Conclusions

Go to: 

In the follow up period of 6,5 years the overall mortality after biopsy proven viral myocarditis is more than 20%. The best predictors of death were the presence of LGE and a dilated LV at the initial presentation.

- There is no such thing as “mild” myocarditis
- Presenting to hospital : 1 in 2.5K to 1 in 6k - to **1 in 250 cases**
(Thailand)
- BUT many myocarditis cases will not present to hospital - but still have damaged heart muscle
- What is the observed **MORTALITY** of MYOCARDITIS? **We know - 20% at 6.5 years. 25.5% at 10 years**
- What DON'T we know about the **OTHER** medium and long term effects of the m-RNA injection?

What should informed consent for covid injection for children look like?

Minimum information for informed consent
Has not changed since June 2021

- **The risk of your child dying of covid is almost zero**
- The vaccine has a new gene technology that has **never been used clinically before**
- The vaccine was approved using “**emergency use**” or “**interim use**” authorization. It is **experimental**. Its medium and **long term adverse effects unknown**.
- To qualify for emergency use authorization, there must be an emergency - **there is no emergency in healthy children**
- **Children are of no danger to adults**
- There are **thousands of deaths associated with the vaccine** (VAERS and other reports)
- **Myocarditis** is a serious condition and can be caused by the vaccine. Its real incidence is unknown - 1/5000 to 1/250. **Myocarditis** can be fatal. **Many other serious vaccine adverse events are happening**
- The **risk of the vaccine for your healthy child is likely more than the risk of covid**

The farce of informed consent in Canadian children

Consent for COVID-19 Vaccine for Children

Parents/Guardians: Use a pen to complete sections 1, 2, and 3. A parent/guardian must attend immunization with children age 11 and under or designate an alternate on the signed consent form – to be presented at time of immunization. For children age 12 and up, a signed consent form is required when a parent/guardian is not present.

SECTION 1: CHILD'S PERSONAL INFORMATION (PARENT/GUARDIAN MUST COMPLETE THIS SECTION)

Child's Last Name	Child's First Name	Child's Gender	Birthdate
-------------------	--------------------	----------------	-----------

- It is recommended that parents/guardians discuss consent for immunization with their children. Efforts are first made to get parental/guardian consent for immunizations. However, children 13 years and older who are able to understand the benefits and possible reactions for each vaccine and the risks of not getting immunized, can legally consent to receive or refuse immunizations in Saskatchewan by providing mature minor informed consent to a healthcare provider.

SECTION 2: CHILD'S HEALTH CHECKLIST (PARENT/GUARDIAN MUST COMPLETE THIS SECTION)

- Does this person have any allergies, including to any of the Pfizer BioNTech or Moderna COVID-19 vaccine ingredients, medicines, cosmetics, or foods (e.g. PEG)? No Yes If yes, describe _____
- 2a. Has this person had a COVID-19 vaccine before? No Yes If yes, state COVID-19 vaccine brand (e.g., Pfizer BioNTech or Moderna), date of immunization and dose number _____
- 2b. Has this person had a side effect from a COVID-19 or other vaccine? No Yes Describe _____
3. Is this person taking any medicines? No Yes If yes, list _____

SECTION 3: CONSENT FOR IMMUNIZATION (PARENT/GUARDIAN MUST READ THIS SECTION)

- I have read the information in the Pfizer BioNTech and Moderna vaccine information sheet provided.
- I have had the opportunity to ask questions and they were answered to my satisfaction.
- I understand the benefits and possible reactions (side effects) for the vaccine.
- I understand the potential disease risks to my child if they do not get immunized.
- I understand that in the rare occurrence of anaphylaxis, emergency treatment will be provided to my child.
- I understand that when a vaccine series requires more than one dose, my consent continues until all required doses of the vaccine have been provided to my child, unless I let the school Public Health Nurse know that I cancel my consent.

As a parent/guardian of this child, I understand and acknowledge that it is my responsibility to:

- Seek medical attention should my child have an unusual or severe reaction following immunization. If this occurs, I will seek treatment for my child and notify public health immediately.
- Inform the school nurse of any changes to my child's health status set out in Section 2 that arise after signing this consent form.

It is recommended that parents/guardians discuss consent for immunization with their children. Efforts are first made to get parental/guardian consent for immunizations. However, children 13 years and older who are able to understand the benefits and possible reactions for each vaccine and the risks of not getting immunized, can legally consent to receive or refuse immunizations in Saskatchewan by providing mature minor informed consent to a healthcare provider.

COVID-19 Vaccine Safety

November 2022

Vaccines save lives

- Vaccines are one of the best ways to stop the spread of infectious diseases like COVID-19.
- Vaccines help us protect ourselves, our families, and others around us.
- COVID-19 vaccine can help us make our communities safer, start to resume our normal lives and end the pandemic.

Vaccine Safety

- COVID-19 vaccines are **safe and effective**. They have been fully tested, evaluated and reviewed. A vaccine is only approved by Health Canada if it is safe, it works, it meets manufacturing standards, and the benefits outweigh any risks.
- You cannot get COVID-19 from the vaccine.** It does not contain the actual virus.
- People who are vaccinated may experience mild to moderate side effects.** They are minimal for most people (localized pain, redness or swelling at the injection site, mild fever or headache) and should go away in a few days.
- receives vaccine and then tests positive, they were likely exposed in the previous 14 days and were in the incubation period. COVID vaccines are not live vaccines and cannot cause the disease. The person's next dose would be delayed until they recover.
- Vaccination is voluntary**, but is important to help keep individuals, loved ones and communities safer from COVID-19. Our most vulnerable people can be protected by "**herd immunity**", which is when widespread immunity to an infectious disease develops in a population.

What should informed consent for covid injection for children look like?

Minimum information for informed consent
Has not changed since June 2021

- **The risk of your child dying of covid is almost zero**
- The vaccine has a new gene technology that has **never been used clinically before**
- The vaccine was approved using “**emergency use**” or “**interim use**” authorization. It is **experimental**. Its medium and **long term adverse effects unknown**.
- To qualify for emergency use authorization, there must be an emergency - **there is no emergency in healthy children**
- **Children are of no danger to adults**
- There are **thousands of deaths associated with the vaccine** (VAERS and other reports)
- **Myocarditis** is a serious condition and can be caused by the vaccine. Its real incidence is unknown - 1/5000 to 1/250. **Myocarditis** can be fatal. **Many other serious vaccine adverse events are happening**
- The **risk of the vaccine for your healthy child is likely more than the risk of covid**

My question for parents:

Should you trust your children to a company with a criminal history?

- Our campaign to inform and educate parents and keep our children safe has worked.
- Much more work remains to be done
- But we are winning!

Millions of mothers all over the world have NOT believed the narrative of the covid criminal enterprise - and have heroically kept their children safe

My question for the Government of Canada and provincial governments, their agencies and their operatives; and for the corrupt legacy media:

**Why do you want so desperately to
inject our children with a
dangerous vaccine that they do not
need?**

The suppression of early, effective treatment of covid-19
- eg. **IVERMECTIN**

What happened?

Why did it happen?

Why it must never happen again

IVERMECTIN BEFORE THE PANDEMIC

- “Avermectins” discovered in soil by Japanese scientist **Satoshi Ōmura** in 1973. **Nobel prize in 2015**
- Commercialized as **Ivermectin** in 1981
- Since 1987 has been used **billions** of times around the world to combat river blindness and filariasis - parasitic diseases
- **100 million** doses administered every year
- **Very safe drug - safer than Tylenol**
- In WHO “essential medicines” list

Satoshi Ōmura collecting soil from the very site where the fateful sample containing *Streptomyces avermectinius* (*S. avermitilis*) was taken in 1973. (Photo credit: Andy Crump).

IVERMECTIN BEFORE THE PANDEMIC (contd.)

- Patent long expired. Costs less than 10 cents in most countries.
- Apart from 4 approved uses - **was being used “off label”** for at least 10 different conditions, including head lice
- **20%** of all prescriptions in USA are **off label**. **50%** of all pediatric prescriptions in Europe
- **Antiviral effect of ivermectin already been shown** for a range of viruses - including dengue virus, HIV, encephalitis virus and a range of RNA viruses

IVERMECTIN BEFORE THE PANDEMIC (contd.)

Why Is the FDA Attacking a Safe, Effective Drug?

Ivermectin is a promising Covid treatment and prophylaxis, but the agency is denigrating it.

Why the war against Ivermectin?

Ask yourself:

- If there is SAFE, early, effective treatment - why a vaccine?
- If there is SAFE, early, effective treatment - why “emergency” or “interim” use authorization for a vaccine?
- If there is SAFE, early, effective treatment - why the lockdowns, the masks, the school closures, the business closures?
- If there is **LOW COST, SAFE**, early, effective treatment - where are the billions to be made by big-pharma?

The covid vaccine injured **American**

The screenshot shows the VAERS (Vaccine Adverse Event Reporting System) website. At the top left is the VAERS logo and the text 'Vaccine Adverse Event Reporting System www.vaers.hhs.gov'. Below this is a navigation bar with five blue buttons: 'About VAERS', 'Report an Adverse Event', 'VAERS Data' (with a dropdown arrow), 'Resources' (with a dropdown arrow), and 'Submit Follow-Up Information'. Underneath the navigation bar is a light blue header for the 'Report an Adverse Event - Patient Information' form, with 'Completion Status' on the left and 'Instructions | en Español' on the right. The main content area has a light blue background and contains a checkbox labeled 'Patient Information' on the left and a red note on the right: 'Note: Fields marked with an * are essential and should be completed.'

*“VAERS accepts reports from **anyone**. Patients, parents, caregivers and **healthcare providers (HCP)** are encouraged to report adverse events after vaccination to VAERS even if it is not clear that the vaccine caused the adverse event. In addition, **HCP are required to report certain adverse events after vaccination.**” - <https://vaers.hhs.gov/faq.html>*

SIMPLE, WEB-BASED FORM

The covid vaccine injured **Canadian**

Unlike an American, a **Canadian citizen cannot directly report a vaccine injury to Health Canada, or even to provincial public health**

How to Report

For health care professionals

If a patient experiences an adverse event following immunization, please complete the appropriate Adverse Events following Immunization (AEFI) Form and send it to your local Health Unit in [your province/territory](#).

If you have any questions, contact the [Public Health Agency of Canada](#).

For the General Public

Should you experience an adverse event following immunization, [please ask your doctor, nurse, or pharmacist](#) to complete the Adverse Events following Immunization (AEFI) Form.

<https://www.canada.ca/en/public-health/services/immunization/reporting-adverse-events-following-immunization/form.html>

The covid vaccine injured Canadian - reporting vaccine injury - STEP 1

1. Find a doctor - not always easy for a Canadian

The covid vaccine injured Canadian - reporting vaccine injury - STEP 2

2. Get the doctor to believe you - and accept your injury is related to the vaccine and agree to file a report

The covid vaccine injured Canadian - reporting vaccine injury - STEP 3

3. Ethical, compassionate doctor found -
believes you, accepts vaccine injury.
Wants to file a report.

The covid vaccine injured Canadian - reporting vaccine injury - STEP 5

1. Compassionate, ethical doctor found
2. Believes you
3. Fills out 9 page pdf form (with 40 pages of instructions)
4. Doctor must send form to provincial health agency
5. Public health official must “approve” the vaccine injury - this step is a mystery. If not “approved” the vaccine injury report is stopped cold

The covid vaccine injured Canadian - reporting vaccine injury - STEP 6

1. Compassionate, ethical doctor found
2. Believes you
3. Fills out 9 page pdf form (with 40 pages of instructions)
4. Doctor must send form to provincial health agency
5. Public health official must “approve” the vaccine injury - this step is a mystery. If not “approved” the vaccine injury report is stopped cold
6. If provincial public health “approves” - the vaccine injury report is sent to Public Health Canada/Health Canada and entered

The covid vaccine injured **Canadian**

- Conclusions:

- The Canadian vaccine injury reporting system is **convoluted and broken**
- There are **major roadblocks and impediments** to reporting at every step
- It appears to be **designed to actively discourage reporting**
- **It is failing the citizens of Canada**
- There is an urgent need for an **independent, accessible, robust** and **patient-centred** vaccine injury reporting system

What is an “expert?”

What is a “consensus?”

- The progress of science depends on DEBATE, COMPARISON, DISSENT, THE PURSUIT OF TRUTH
- **There are always “experts” on BOTH sides of a debate**
- An opinion (even a majority opinion) cannot be called a “consensus.”
- **There is NO “consensus” in the covid-19 pandemic** - experts differ on vaccines, on lockdowns, on masks, on social distancing ... that is the way of science

The “Experts” were very wrong

Covid mRNA Shots

“Stop Transmission And Stop The Spread?”

<https://twitter.com/FatEmperor/status/1478887001118154754>

By July 2021 the CDC and Fauci had already changed their story - Delta could infect and spread just as easily among the vaccinated.

CDC says fully vaccinated people spread the Delta variant and should wear masks: 'This new science is worrisome'

Aria Bendix Jul 27, 2021, 2:15 PM

CDC Director: Vaccines No Longer Prevent You From Spreading COVID

Posted By **Tim Hains**
On Date August 6, 2021

The other Experts were correct - vaccines for all was NOT the way out of the pandemic (days of Delta)

The time of Delta - did highly vaccinated countries do better?

Increases in COVID-19 are unrelated to levels of vaccination across 68 countries and 2947 counties in the United States

[S. V. Subramanian](#)  & [Akhil Kumar](#) Harvard study - the vaccinated acquire and spread covid-19 just as efficiently as the unvaccinated

European Journal of Epidemiology **36**, 1237–1240 (2021) | [Cite this article](#)

2.08m Accesses | **10** Citations | **26245** Altmetric | [Metrics](#)

About this time - very highly vaccinated countries were showing very high rates of covid-19 infection and transmission - Israel, Gibraltar (100% vac.), Iceland ... USA ... UK ...

What is “misinformation” and “disinformation” in science?

- Both terms were used extensively in Govt propaganda in Soviet Russia and Nazi Germany
- **It cannot be : “I don’t agree with you” = misinformation/disinformation** (Colleges take note)
- **If you don’t agree with me, debate, discuss and disprove me - that is the way of science.**

“Over the past three years not one person who has accused me of disseminating mis/dis-information related to COVID-19 has ever offered me the courtesy of a conversation prior to doing so. Not one.”

“For the common good”

- Individual and societal evils (bad) cannot justify “the greater good.” **They are fundamentally opposed ideas.**
- But individuals and people (even churches) can be deluded and scared and traumatized into believing that the harm they do is “for the greater/common good.” **This is the playbook of totalitarian regimes**
- **By repeating the harms (eg. Loss of our freedoms and liberties) the “common good” delusion is normalized and the people become desensitized to harm and evil.**

No job could mean no job for Air Canada employees

Workers without valid reason for an exemption have until Oct. 30 to be vaccinated

KARON LIU AND SIMRAN SINGH

Air Canada announced Wednesday that it is mandating COVID-19 vaccines for all of its employees, following other airlines that have announced vaccine policies for their workers. The airline also announced that those who fail to comply or qualify for valid medical reasons may be terminated.

In a press release, it stated that all employees have to be fully vaccinated against COVID-19 by Oct. 30. It will also be a requirement for prospective employees of the company.

"Under the mandatory vaccination policy, testing will not be offered as an alternative. While Air Canada will SAE its duties to accommodate employees who have medical concerns, such as a confirmed medical condition, we will not be able to accommodate those who do not want to be vaccinated."

"Air Canada's policy is also in accord with a recent announcement by the Government of Canada requiring employers in the federally regulated air, rail, and marine transportation sectors to be vaccinated by the end of October 2021."

AIR CANADA (continued on B2)

Licensing bodies (CPSS, CPSO etc), The Academy - and LYSENKOISM

Gregor Mendel

T.D. Lysenko (1898-1960)

N.I. Vavilov (1889-1943)

“Math has no place in biology” - Lysenko

Lysenkoism = ONLY my view of science is the truth.
Everything else is conspiracy, false and misinformation

- Scientists and physicians were persecuted by the Soviet communist system if they strayed from Lysenkoism - i.e. the official narrative
- In time this came to include all of science except nuclear physics and space
- More than 3000 scientists were deported to the gulag, imprisoned or executed

Lysenkoism and the Academy/ University in the covid-19 era

- The Academy/University has paid lip service to “academic freedom” - but has implemented **academic tyranny**
- The **official covid narrative** (“**covidism**”) has become a religion with deeply flawed people like Fauci the religion’s **high priests**. **This religion has prayers, chants and slogans eg. “Vaccines are safe and effective”**
- When faced with the evidence to the contrary, the Universities have retreated to the well known methods of tyrannies - “this is disinformation; this is a conspiracy; this harms the common good ...etc” ... followed by **persecution**
- **The free exchange of scientific ideas, scientific dissent, debate and the pursuit of scientific truth has been abandoned**

Lsyenkoism and the Licensing Bodies (CPPSS, CPSO, American Boards etc) in the covid-19 era

- The licensing bodies are asking physicians what and how to think - i.e. have become **the thought police of covid Lysenkoism**
- Accordingly, an opinion expressed contrary to the official **covid narrative (covidism)** is found in breach of official narrative rules
- **The religion (covidism) then threatens to excommunicate you** (take away your **license**), unless you recant. **The data and evidence do not count.**
- The persecution is pursued with religious fervour by licensing officials and academic and professional colleagues - **for “the common good”**

Trudeau, Wuhan, Fauci ... and Pfizer:

3 Questions:

- The lab leak theory (once considered a racist “conspiracy”) is now considered most likely
- What really happened in Winnipeg - Canada’s Taxpayer Funded Level 4 infectious diseases lab?
- Why is Trudeau hiding the truth from Canadians? And going to extraordinary lengths to do so?
- Was “gain of function” research being done in Winnipeg - then exported to Wuhan?

Thank you
